

2020 (shared baseline)

2100 (RCP 8.5 dry)

Duck pairs per EAU

10,000

20,000

30,000

One tile = one EAU (28,200 ha); outlines are Wetland Management Districts. Both panels share one colour scale, so tiles are directly comparable across years. Colour is strictly proportional to duck pairs (no transform).
